

1 Project Management

2 Designer

3 Raw Materials Supplier

4 Manufacturer

5 Assembler

6 Item Supplier

7 Retailer

8 Wholesaler

9 Parts Supplier

10 Service Provider

For Documentation:

To enhance the user experience on the supply chain map interface, I designed a set of category specific icons representing 10 types of companies. The focus was on clarity, semantic relevance, and visual consistency.

Design Tools & Method

I used Figma as the main design tool.

Icons were sourced via the Font Awesome Figma plugin, ensuring a clean, professional outline style suitable for digital maps.

Icons were selected based on the core function of each company type, making it intuitive for users to understand the role of each participant at a glance.
